THE MICROPIGMENTATION COMPANY

Permanently beautiful

MICROPIGMENTATION
CATALOGUE 2019

Germany's No.1 Method in Permanent Make-up

1st Place Customer Satisfaction
1st Place Innovation

Powered by the vision of “Making The World More Beautiful” , for 20 years we have put all our passion into giving our Goldeneye institutes a perfect understanding of our love for this profession. This was finally honored at the Beauty Forum 2018 with the 1st place for Customer Satisfaction Permanent Make-Up and the 1st place for Innovation Permanent Make-Up.

So we would like to say a big and proud “Thank you!” to the whole Goldeneye Family, grateful for the trust and the faith in us!

Innovative technology:
Goldeneye device systems –
created by visions
made for perfection.

Technology

Golden i touch 3.0

An investment that will secure your success for years to come!

Golden i touch 3.0

Created by visions made for perfection

Do you like functionality, cutting-edge technology and working immaculately with a sense of elegance and luxury? You demand the best from both yourself and your equipment? Go for the Golden i touch 3.0!

The Golden i Touch 3.0 is crafted into an exquisite, sophisticated design with a smart, fully front-covering glass surface. The high-resolution touchscreen ensures a supremely precise yet simple operation. The handling is very intuitive: You select skin type, treated body area and technique. The Golden i Touch suggests the suitable module (i.e., applicator) and automatically regulates all configurations necessary. Needless to say, an experienced user – or someone who enjoyed the Crystal Tech or Multitalent configurations – can make manual modifications. The Quickselect menu offers shortcuts which can be selected with one click!

With the "Regulate" feature, we have made sure that the treatment itself is also easy: During the pigmentation, the Dermograph SLS is in a sensory feedback loop with the Golden i Touch 3.0. The skin resistance is constantly being analyzed and the pigmentation configurations adjusted accordingly. This ensures an unprecedented level of even and smooth pigmentation, regardless of working on tougher scar tissue or on more sensitive skin. The Golden i Touch feels the difference and regulates speed and power! Enjoy the easy way of pigmentation – effective, successful and creative!

Suitable for Master, Professionals & Beginners

Special features:

- Serially equipped with **Dermograph SLS**, optionally Classic
- **10" High Resolution Touchscreen Display**
- **"Regulate" mode** – manages power and speed, depending on skin
- **full-front glass surface** enables easy and hygienic cleaning
- **„made in Germany“** – in house planning, development, programming, production
- **2 handpieces** can be connected

i cube

the power device for Goldeneye World of Beauty

i cube

You don't need much room for a whole space of ideas

From now on, all you will need in your institute, is a small and compact power device. With the i cube all Goldeneye Micropigmentation handpieces (including Microblading) and all handpieces of the bdr Medical Beauty Concept can be controlled. Including Dermabrasion, Microneedling and Microstimulation.

The entire space of the Goldeneye World of Beauty is revealed to you providing over 130 techniques in the area of micropigmentation and more than 60 options in the field of bdr.

Innovative, small and easy to navigate, the i cube takes you literally by hand and guides you through the settings of the free of charge app on your Android or Apple tablet. Never beauty was that smart, never before has cosmetics been so effective – possibilities, without limits, just in a single device.

All up-dates of the software will be permanently free of charge. Stay flexible at all times – with the latest innovations from permanent make-up and medical beauty. You have the talent, the knowledge, the dedication – the i cube is your personal fusion of your heartfelt passion and professional Goldeneye technique.

Suitable for Professionals & Beginners

Art.: 201211

Content:

Set Mixer & Detector wireless

Art.Nr.: 201211.H

Content: 1x Mixer, 1x Detector

Wireless Micromix

Predelineate & Mix

A clever 2-in-1 solution. Every color is blended to a smooth, finely texturised suspension, simultaneously the tip is prepared as a sterile brush for hair fine preliminary sketches.

Logical, practical and hygienic.

Art.: 201510

Content: 1 piece incl. batteries

Wireless Pigment Detector

Test Exactness

This special detector light under-lights the skin and makes the density of the pigment implantation visible. Gaps are immediately detected and correctable. Further repair work becomes avoidable. A significant tool designed your time management and greater economical efficiency. The pigment detector achieves consistent results faster

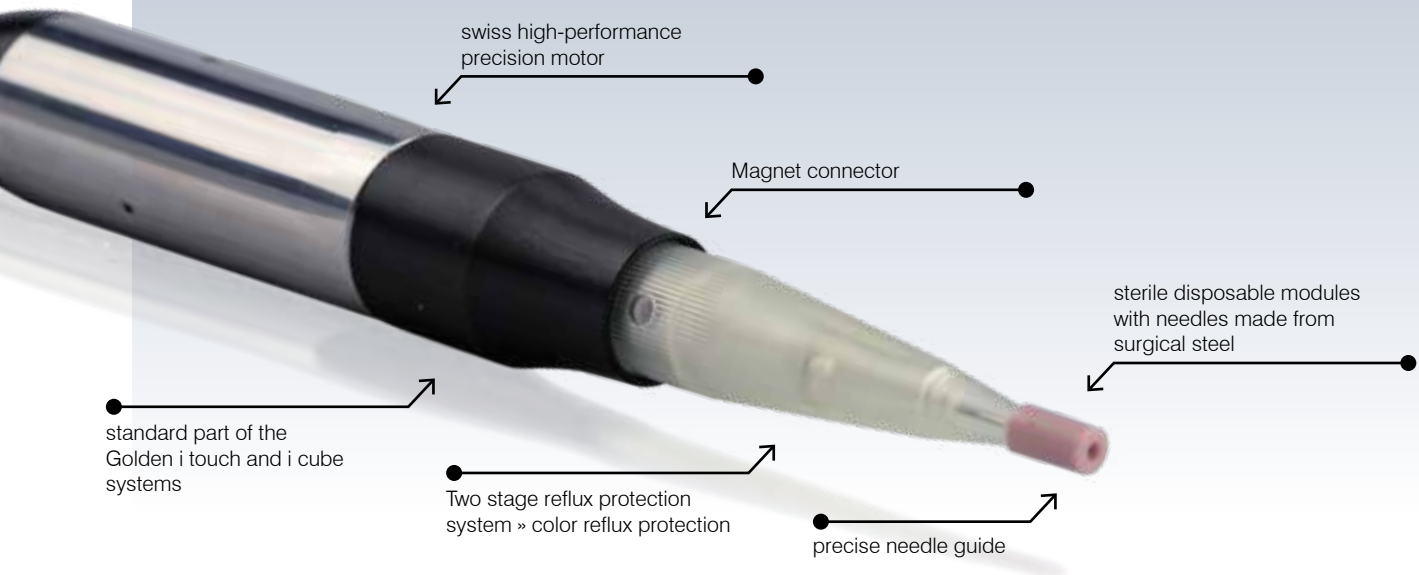

Art.: 201810

Content: 1 piece incl. batteries

Handpiece Dermograph SLS

Precise, easy, fast and safe!

Pigmentation has never been so precise, simple, fast and safe! The SLS dermograph is setting new standards! The Swiss high-performance precision motor guarantees precision and power. The two-stage reflux protection system provides safety and a smooth hygiene chain. The highest level of safety and quality for client and pigmentist@!

The handpiece is powered by a maintenance-free Swiss quality motor and the power transmission via a precision gear. This technology is exclusive to Goldeneye! The direct power transmission in the handpiece guarantees an absolutely quiet and precise run with varying needle length. This means the pigment colour absorbs quickly and gently into the skin. The treatment duration is short and thus significantly more pleasant. The patented reflux protection system and the mandatory hygiene cover ensure a seamless hygiene chain.

Art.: 201301

Special features:

- Hygienic protection system
- Simple, fast application thanks to magnetic connectors
- 100 % safety
- German Technology since 1998
- patented technology
- full customer satisfaction
- 1st Place Innovation Permanent Make-up

Handpiece Dermograph Classic

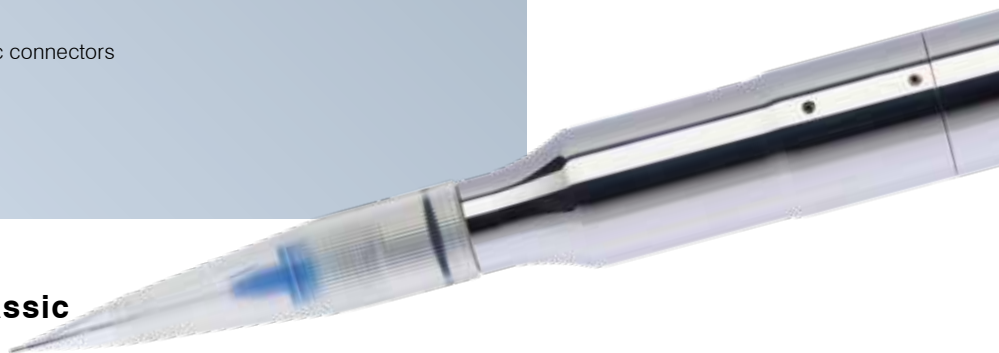

The flyweight

The dermograph rests comfortably in the hand with minimum weight and is fun for both professionals and those starting out in their career.

The direct power transmission in the handpiece guarantees an absolutely quiet and precise run with varying needle length. This means the pigment colour absorbs quickly and gently into the skin.

The treatment duration is short and thus significantly more pleasant. The patented reflux protection system and the mandatory hygiene cover ensure a seamless hygiene chain.

Coloressense Colors
as well as Goldeneye **care** and
cleaning products are suitable
even for **sensitive skin**.

Colors, cleaning & care products

THE 3 in 1 COLORESSENSE CONCEPT

Coloressense
Colour essences for sensitive skin
powered by Goldeneye

Coloressense PUR

for large scaled
pigmentations and
shadings

Coloressense Pigments

Because of the highest possible pigment density, Coloressense Pigments are destined for every kind of pigmentation, you can use them pure or thinned.

Being concentrated „pure“ they are used for large scaled pigmentations, as shadings and full drawings.

Usage category:
pigmentation color: pure

Coloressense + EASY FLOW

for very delicate and
precise drawings

EASY FLOW Color Activator

Coloressense concentrate mixed with Easy Flow leads to a hydrophilic color pigment, which suits perfect for exact hair drawings and precise contouring.

The coloressense concentrate becomes very fluent without losing its opacity.

Usage category:
As a pigmentation color:
7-10 drops of the pigment for
1-2 drops Easy Flow

Coloressense + SKIN TOP

for pigmentations that
require a fast handpiece
guidance and for
pigment masks

SKIN TOP Calming Liquid

Mixed with Skin Top, the coloressense concentrate turns to an oily pigment – perfectly fitting for all pigmentations with a fast handpiece guidance (Powdery) or glossy pigmentations (Stardust Gloss).

Through the large enrichment of witch hazel extract, Skin Top appears haemostatic and regulates the lymph drainage, which smoothes the whole treatment session.

Usage category:
As pigmentation color:
10 drops pigment
for 2-4 drops Skin Top
As a pigment mask :
Remaining pigment for
1-2 Tropfen Skin Top

The advantages of Goldeneye Coloresense

Quality „Made in Germany“

- according to ResAP (2008)1: Micropigmentation at the highest level in convincing brilliance with unprecedented security in more than 30 shades.

Sustainability and responsibility

- Continuous quality management,
- IT-based formulation
- without animal testing by conviction – vegan.

Hygienic monodose

- precise dosing at any time
- sterile and tested several times
- uniform pigment particle size
- constant quality management

100%* WITHOUT heavy metals

- without heavy metals*
- without Nickel*
- without PAH*
- without NDELA*

For your information:

vegan: 100% free of animal products

Heavy metals: Common ingredient in pigments, many are harmful or toxic, as they can not be broken down in the body.

Nickel: Pure metal, common ingredient in mineral pigments, the most common cause of contact allergy.

PAH: Polycyclic aromatic hydrocarbons (in many pigments), slightly water-soluble, numerous PAHs have been proven to be carcinogenic.

NDELA: Nitrosamines are a reactive product of nitrite and amines (as in proteins) Proven to have a strong carcinogenic effect.

Development, manufacturing, training and sales of cosmetic products.

ISO certified according to DIN EN ISO 9001

* 100% without = Proof only thru complete decomposition.

It depends on the right mixture

NEW
COLORESSENSE
CONCEPT

EASY FLOW

Color Activator

A Pigment Thinner, including an additional caring elixir, providing with hazel water, that is known for encouraging the body's own regenerative abilities, what may lead to a speedy healing. The pigments will be implemented in a soft, light, fast and even way, so that the skin will recover much faster.

Easy Flow is used right before the pigmentation treatment. You'll only take some drops and stir it with the Micromix.

Art.: 239999
Content: 30ml

TIP

Through 15 drops of pigments, use 3 to 4 drops of Easy Flow. This scale won't harm the intensity and opacity. In case, the treatment might become more time consuming, you may add one drop to the Coloressence pigments, because only free flowing color can be implemented at its best.

NEW
COLORESSENSE
CONCEPT

SKIN TOP

Calming Liquid

Due to its high concentrated part of witch hazel, the wound healing will be influenced in a very positive way. The Native Americans appreciated this plant as a very precious medical plant. Even in Europe, we use it since the 17th century to cure small skin injuries.

Art.: 204370
Content: 30ml

TIP

Apply it on the pigmented skin in between the treatment. The Skin Top Calming Liquid might help to end optional hemorrhage and stop the lymph flow, what eases the treatment a lot. Through using water shadows and water colour techniques we can strongly recommend it as a suitable thinner because of its oily appearance. (e.g. for powdery or glossy pigmentations).

Skin Top is also ideal for use as a color mask after treatment.

Real Black 290 – the ultimate Black is back

NEW

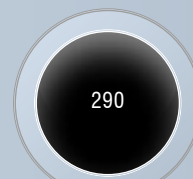

Real Black 290

This liquid, black pigment is rapidly delivered into the skin, regardless of using a #1/#3 LPMC applicator for fine dots and powder techniques, or a #3 for thickening eyelashes – even using #5/#7 LPMC for expressive eyelid lines is possible!

REAL BLACK's risk of pigment migration is down to almost zero and as such it is very well-fit for thin skin and long lid lines – practically without any blow-out.

Art.: 237290

Content: 1 x 10ml bottle

Real Black
Art. 237290

Goldeneye Pigments⁺

Highly concentrated pigments in hygienic 3ml tube. Pigments⁺ are applied pure and can be mixed with other Pigments⁺ colors.

Please note: do not mix with other color series
e.g. Coloressense.

Art.Nr.: 233xxx
(xxx=Farb-Nr.)

Content:
6 x 3ml Mono can
Pigments⁺

Beauty Advice

Product	Use	Treatment	Effect	
GE Tonic Art. 202545	Cabin	Skin cleaning before pigmentation and after final cleaning	Deep, sanitizing cleaning	Tip for home use: effective eye make-up remover Tip for cabin use: Die Gesichtshaut wird schnell und gründlich von Schlieren und Farbresten befreit. Vorsicht! Nicht zu intensiv auf der pigmentierten Zone massieren, damit keine Farbe ausgelöst werden kann!
Rescue Balm Art. 690100	Cabin + retail	After-pigmentation care.	Concentrated compound of agents (10% Propolis, Panthenol, etc.) for herpes prophylaxis and for promoting wound healing. Smoothens lips. .	Tip for home use: Apply several times daily, especially after lips pigmentation and if lips tend to dry skin or herpes. Soothes, protects and regenerates all dry, irritated and scaly skin areas. Do NOT apply around eyes!
WASH! Art. 204150	Cabin + retail	Care and Cleaning – both during and after pigmentation	Soothes and sanitizes (anti-histamine agents)	Tip for home use: Perfect for home care and as cleaning foam after pigmentation, as well as for regular cleaning of sensitive and impure skin. Also effective against odor-producing bacteria. Tip for cabin use: Add 1-2 dashes to a small bowl of water, immerse cotton pads before applying.
EasyFlow Art. 239999	Cabin	Color Activator – during pigmentation	For a smooth and liquid pigment used in drawings with superior opacity; also, for a more transparent foundation pigment	Tip for cabin use: For increased opacity: add 1-2 drops of Easy Flow to 7-19 drops of pigment; for higher transparency, use a ratio of 4-5 drops of Easy Flow to 5 drops of pigment.
Skin Top Art. 204370	Cabin	Pigment modifier and Calming Liquid – during pigmentation	For an oily foundation pigment (used in powdery pigmentations); also, styptic calming liquid (contains witch-hazel, constricts blood vessels)	Tip for cabin use: add 2-4 drops to 10 drops of pigment; the more Skin Top, the glossier the result. Undiluted Skin Top can also be applied to pigmented areas.
PUSH! Art. 204250	Cabin	Cleaning and care during pigmentation	Soothing, calming anti-histamine agents; smoothens the skin; skin becomes more receptive to pigments.	Tip for cabin use: Apply after intermediate anesthesia for a short phase of regeneration. Leave on briefly, swipe off dry. Can also be used for deep cleaning in between treatments and loosening of pigment mask.
SOS Art. 204340	Cabin	Care – right after pigmentation	Lips and eyebrows care immediately after pigmentation; protects and promotes healing, prevents scarring.	Tip for cabin use: Apply thinly with sterile cotton swabs for sealing.
SOS² Art. 204345.12	Retail	Care – right after pigmentation	Lips and eyebrows care during the first days after pigmentation; natural nurturing oils promote wound healing; reduces scaling.	Tip for home care: The customer always receives SOS ² for free after pigmentation for home care. Apply thinly with sterile applicator several times daily for at least 3 days. Tip for cabin use: Mild care balm which can be used for sealing after pigmentation.
Minerox Art. 204360	Retail	Care – after pigmentation	Anti-inflammatory, antibacterial liquid, promotes wound healing.	Tip for home care: Effective as care after pigmentation of brows and lips, promotes wound healing.
HUSH Art. 204350	Retail	Care – contains both SOS and Care, after pigmentation	SOS protects and soothes, Care increases regeneration.	Tip for home care: Can be applied on eyebrows and lips. SOS: Applied during the first three days after pigmentation to protect and soothe the pigmented area. Care: To be used from the third day on, helps the affected area to regenerate.

Cleaning & Care

GoldenEYE Tonic ASM

Anti Swelling Micellar

GoldenEYE Tonic ASM is characterized by an extremely high cleaning performance and the decongestant effect.

It is applicable as a makeup remover, which prepares the skin for a subsequent treatment. During a treatment it has a calming effect.

Attention, very high cleaning performance, do not use as a compress!

Art. 202545

Content: 250ml

incl. 8 x 10ml Mini bottles

Art. 202540.01

Content: 8 x 10ml Mini bottles

PUSH!

Advanced Penetration Gel

PUSH! replaces PPG. The patented and award-winning ingredient „Symssitive“ prevents the over-reacting of skin has a calming effect. „Dragon's Blood“ promotes wound healing can be effective against the formation of herpes.

For best treatment comfort, apply soothing gel before and between coats very sparingly and gently with a sterile cotton swab.

Art.Nr.: 204250

Cabin product:

Content: Tube 15ml

WASH!

Deep Cleansing Concentrate

This hygienic cleaning concentrate is suitable for all skin types and predestined for professional use prior to Micropigmentation. It impresses with its creamy, velvety foam and its compatibility. Also ideal for home care, not only for pigmented skin.

Art.: 204150

Content: 1 Dispenser 50 ml

S.O.S.

Soothing Oilfree Skincare

Cabin use: This oil-free super-serum is the perfect emergency aid after micropigmentation, as well as for all other minimal skin trauma. Fast-acting ingredients reduce irritation and relax stressed skin. SOS Care promotes the prevention of scars and forms a protective shield against acid, cold, or other harmful external influences.

Art.: 204340

Content: Tube 15ml

SOS²

Regenerating Micropigmentation Balm

During the first days after your micropigmentation treatment, balancing Balloon Vine Extract, Panthenyl and regenerative agents such as Vitamin E and Avocado will recover your skin like an invisible First Aid.

High-quality plant extracts and herbal oils, such as Echium oil, will protect and nourish your skin, leaving a soothing and anti-inflammatory effect at any time.

Application: Extract a minimum amount in a hygienic way and apply it on the pigmented area, several times a day.

Tip: SOS² is suitable as a customer gift after the lips and eyebrow pigmentation.

Art.: 204345.12
Content: 12 x 5ml

HUSH!

Soothing care duo

With HUSH! you now have a universally applicable care duo with a user-friendly applicator

S.O.S. – Soothing Oilfree Skincare: „Unisoother“ as a natural immune booster has an anti-inflammatory effect. „Dragon's Blood“ protects and calms down. Application: 1st to 3rd day after the pigmentation

C.A.R.E. – Calming And Regenerating Essence: Soothing and regenerating cream for stressed skin areas. After micropigmentation the skin requires special care and an extra dose of self-healing and regeneration. CARE supports the skin in that process. Application: from the 3rd day after the pigmentation

Art.: 204350
Content: 6 Applicators
(4 ml SOS and 7,5 ml CARE)

MINEROX

Calming Skincare Fluid

The optimal care after pigmentation, in order to support the color change within the skin, apply for eyebrows, eyes and lips. In the first days, every micropigmentation is very sensitive. Wrong or inadequate care may cause inflammation or the pigments

Application: After Micropigmentation please use this as a supporting care on the affected skin for 3-5 days. Apply thinly with a cotton swab.

Art.Nr.: 204360
Content: 6 Bottles à 4ml

The Art of Micropigmentation

Band 1 und 2

The cosmetics industry is diverse and colourful, engaging and interesting. Countless cosmetics students, fledging colleagues and experienced beauty professionals are on the lookout for new horizons and a special challenge that goes beyond classical cosmetics training.

Micropigmentation is a profitable business, which requires a lot of knowledge, creative courage and very responsible action.

Holger Hoffmann is one of the most successful pigmentists in Europe. He is the creative head of the Goldeneye method and has trained and coached numerous pigmentists and trainers in this area in the past. In his second work, he not only gives an insight into the supreme discipline of permanent makeup, but also presents the entire breadth of knowledge on the subject, the latest techniques, the state-of-the-art methods and the latest findings on micropigmentation and permanent makeup. Individual steps are explained in a logical sequence in a precise and understandable way. In two detailed volumes, one building on the other, the reader learns about everything that has made Holger Hoffmann and the Goldeneye method so transcendent and successful.

- **Over 80 different micropigmentation techniques**
- **Special techniques for eyebrow, eyelid and lip shaping**
- **Tips and tricks for additional treatments, reconditioning and corrections**
- **Paramedical treatment options (areolae, scars, vitiligo)**
- **Tips for preliminary drawing**
- **Everything about colours and colour mixtures**
- **Troubleshooting and corrections**
- **Improvement of drawing errors and removal of distortions**
- **Scalp pigmentation (tricopigmentation)**
- **Theoretical knowledge**
- **Motivating impulses**

Training, Masterclasses & Skills Micropigmentation

Goldeneye Pigmentist

For Beginners and Newcomers to Goldeneye

Plan your
success story now!
Have fun implementing
your ideas and enjoy
successful, profitable,
and creative pigmen-
tation without any wor-
ries!

Tools and colours are not the only areas aspects where we have seen developments in the last few years; micropigmentation techniques have also been developed developeddevolved. Drawings that are getting more and more creative, finely detailed pigmentations, ever more accurate procedures, a sense of responsibility when it comes to hygiene, and the implementation of great technological ideas have all marked the beginning of a new era in micropigmentation. Nowadays, Pigmentists® are only successful if they really stand out from the crowd (competition). The first step is an excellent training course followed by further professional development training. This is exactly where our new training concept comes in: More intensive, more specialised and even more practical!

www.goldeneye.academy

Pigmentist® 1 – BRONZE Basic Training
